

FOAMplus[®] — Foam-In-Place Cushioning Systems

- Molds around any product to hold it securely in place
- Resilient — absorbs transportation shocks
- Versatile - different foam densities available to meet your packaging needs
- Lightweight, reliable protection
- Hand-held and/or Foam-in-bag options
- Clean, neat product protection
- Space saving

STOROPack

FOAMplus® BAGPACKER

The Fast, Easy and Efficient Foam-In-Bag System

FOAMplus® saves time and money providing economical, efficient and secure protection for products of virtually any size, shape or weight. Designed to cut waste, improve efficiency and simplify operator training, the FOAMplus® BAGPACKER system has an easy-to-use programmable controller that stores settings for up to six different bag sizes with varying degrees of foam-fill amounts. The self-cleaning gun and the robust design help keep maintenance costs to a minimum.

- Produces 23 foam-filled bags per minute at the touch of a button
- Operator can easily change bag sizes and foam-fill amounts based on the packaging requirements

Free-forming Around Product

1 Operator chooses a button with a pre-set bag length that will carefully meter a certain amount of foam. The pre-formed bag and foam are quickly dispensed.

2 The bag is immediately placed in the box, and the product lowered in as the foam continues to expand.

3 A second pre-filled bag is placed on top.

4 Seconds later FOAMplus has created a clean, protective pad of foam around the product.

Pre-forming Using A Mold

1 Operator chooses a button with a pre-set bag length that will carefully meter a certain amount of foam. The pre-formed bag and foam are quickly dispensed.

2 The bag filled with FOAMplus is placed in a mold designed to match the product.

3 The lid is closed. The FOAMplus foam expands inside the pre-mold box, creating a mirror image of the product.

4 A few seconds later a pre-formed mold is ready and waiting. Customized protective packaging for immediate use.

FOAMplus® HANDPACKER

The Direct Foam System

The FOAMplus® HANDPACKER is hand-held system with a fully electronic microprocessor control to maintain consistent quality. One of the the fastest foam-packaging systems available, FOAMplus® HANDPACKER speeds up the packing process without sacrificing packaging quality. Plus, the self-diagnosing software in the FOAMplus® HANDPACKER system keeps everything working smoothly and effectively. The foam gun is self-cleaning and delivers packaging foam of the very highest quality.

Free-forming Around Product

- 1 Once the FOAMplus liner has been spread in the container, the FOAMplus foam is dispensed directly into the box and the liner is laid over the expanded foam.
- 2 The product you want protected is placed onto the foam while it continues to expand.
- 3 A second liner protects the product and the top cushion of foam is dispensed.
- 4 Seconds later FOAMplus has created a clean, protective pad of foam around the product.

Pre-forming Using A Mold

- 1 A pre-cut length of film is placed over the mold box and a vacuum is drawn.
- 2 Operator dispenses a previously set metered amount of foam into the film lined pre-mold box.
- 3 The lid is closed. The foam expands inside the pre-mold box. A few seconds later the foam has set.
- 4 The lid is opened and a pre-molded image is removed and ready for packaging. Customized protective packaging for immediate use.

FOAMplus® Foam-in-place Protective Packaging.

Foamplus® from Storopack is a unique packaging solution that forms a perfect fit around any product regardless of size, weight or fragility. Foamplus molded cushions are produced on demand at the packing station and form to the shape of the product. The cushion is extremely impact-resistant and lightweight, providing a high-grade, custom-fit protective barrier for your product.

The FOAMplus® BAGPACKER controller has 6 preset sizes, which can be easily reprogrammed to give total flexibility for the operator. The FOAMplus® HANDPACKER controller is easy to use and is programmed for monitoring and efficient metering.

THE STOROPACK SERVICE ADVANTAGE

While we're always working on ways to improve the packaging inside the box, we know that what happens outside the box is just as critical to your operation. At Storopack, service isn't an afterthought; it is at the core of our business. Our skilled representatives and service technicians provide the knowledge and the responsiveness to ensure your packaging systems are operating at peak efficiency.

We'll be there for you fast. With over 20 facilities in North America and more than 70 combined manufacturing and distribution locations worldwide, swift, attentive service is our norm.

REDUCE – REUSE – RECYCLE

Storopack participates in a nationwide recycling program. Contact your Storopack representative for further information. Together we can protect

WHATEVER YOU NEED TO PACK: THINK STOROPACK

- PELASPAN-PAC® Loose-fill
